The Beaumont 6 series multi-fuel stove in parchment paint finish is shown with the Burlington limestone surround from Chesney’s collection of hand carved fire surrounds.
An introduction to
Chesney’s Solid Fuel Stove Collection

Over the past quarter of a century Chesney’s has created a range of hand carved fire surrounds that are widely recognised as the finest in the world. This reputation has been achieved by a rigorous and uncompromising commitment to the finest craftsmanship and integrity of design.

Now, following an exhaustive programme of research and development, Chesney’s is manufacturing a unique range of wood burning stoves that employ the very latest technology to deliver outstanding levels of efficiency with minimal emissions.

But a stove should be more than an efficient heating appliance. It should be a significant element in the design of a room and its main focus when lit. Chesney’s has produced a range of stoves that incorporate traditional, retro and contemporary styles and which display a design aesthetic and degree of sophistication that is entirely unique in the world of stoves.
A lifestyle choice
A wood burning stove will allow you to heat your home using a genuinely renewable and natural fuel in the most efficient way possible to provide maximum heat with the minimum of emissions.

Environmentally friendly
The burning of wood makes sound environmental sense whereas fossil fuel energy reserves such as oil, gas and coal are finite and their use causes climate change. A healthy tree produces oxygen by absorbing carbon dioxide from the air.

During the combustion process, the wood will produce the same amount of carbon dioxide as it absorbed during its growth, meaning that the process is wholly carbon neutral. Burning wood will also produce no more carbon dioxide than would be released by a tree that is left to decay naturally.

Effective source of heat
An open fire loses a substantial proportion of the heat that it generates through the chimney and pulls large volumes of air out of the room. When an open fire isn’t in use it continues to draw air up the chimney draining warmth from the home and creating draughts.

By contrast a stove is capable of achieving an efficiency rating of up to 85% when in use, eliminating the heat loss that results from an open fireplace and when not in use, it will prevent heat from escaping up the chimney.

Economical and beautiful
Traditional energy sources can no longer be relied on to provide a stable and fairly priced supply. Using a wood stove to heat a room offers the opportunity to exercise some degree of independence from the large utilities and to benefit from a heat source that can be far more economical.

Heating your home with a stove will provide warmth that no other energy source can equal. The flame patterns that a stove will create are captivating, constantly changing and will bring a welcoming and heart warming presence to any room.
Responsible woodland management, including coppicing for fuel, can protect and preserve our woodlands.
Five reasons to buy a Chesney’s stove

When we decided to produce a range of stoves we asked our engineers and designers to create a stove that would be the best – totally dependable, ultra efficient, environmentally friendly, easy to use and great to look at. And that’s exactly what they’ve done.

**Reliable**

Our stoves are designed to last. Using only the very best materials, including cast iron components produced to the highest technical specifications and the toughest ceramic glass, our stoves will provide a safe and dependable source of heat for years to come. Our confidence in the product is reflected in the five year guarantee we offer for the bodies of our stoves and the one year guarantee we offer for all non-consumable body parts.

**Efficient**

Our sophisticated manufacturing process uses state-of-the-art robotic welding techniques which ensure that every stove is tightly sealed. This means that the air supply to the stove can be easily controlled, reducing for a slow burn or opening up for an intense, roaring fire. Our stoves also provide heat by both radiant and convection methods and incorporate the latest clean-burn and air-wash technology, delivering maximum warmth and underpinning the outstanding efficiency rating that they have demonstrated in independent testing.

**Clean**

The clean-burn and air-wash technology which our stoves use means that the polluting by-products emitted by the initial burning are re-ignited and burnt again in the stove. This double combustion substantially reduces emissions and contributes to a cleaner, healthier environment. All of our stoves are DEFRA exempt for use in smoke control areas. This means that a Chesney’s stove can be safely and legally used to burn logs in all major cities and towns throughout the UK.

**Easy to use**

One of the most important challenges facing our engineers was to design a stove that was genuinely easy to use. In addition to a simple fuel selector, a Chesney’s stove is operated by means of a single air control lever. With its smooth operation, this lever allows easily controlled temperature adjustment from a gentle flame to an intense burn.

**Attractive**

Stoves have for too long just been viewed as utilitarian heating appliances with little emphasis on their appearance. Our collection of stoves is beautifully designed to include both traditional and contemporary styles to suit a wide range of interiors.
The Belgravia

The Belgravia displays the strong architectural styling that characterises every stove in the Chesney’s range. Its classical plinth, cornicing and dome shaped viewing glass combine to create an elegant stove of handsome proportions.

It is available as a six or eight series multi-fuel stove and a four series wood burning stove.

The Belgravia
8 series multi-fuel stove is shown in black anthracite paint finish.

DETAILED
Full specifications
Pages 38-40
The refined and understated appearance of the Belgravia allows it to sit comfortably within the most elegant of period rooms or to be used as a signature piece within a contemporary setting.

The Belgravia 6 series multi-fuel stove is shown in sage green paint finish and the Burlington limestone surround from Chesney’s collection of hand carved fire surrounds.

DETAILS

Full specifications
Pages 38-40
The Alpine

The Alpine stove with its imaginative retro styling is quite unique. Its nickel plated ornamentation and rounded lines combine to create a stove that is visually stunning.

The Alpine is available as a six series multi-fuel stove and a four series wood burning stove.

The Alpine
6 series multi-fuel stove finished in Atlantic blue paint is shown with the Devonshire limestone surround from Chesney’s collection of hand carved fire surrounds.
The design of the Alpine stove lends itself to a variety of eye-catching finishes and the six series multi-fuel stove is shown here in black anthracite which provides a perfect contrast to the satin brushed nickel door furniture and grille.
The Milan 6 series multi-fuel stove is shown in silver paint finish.

DETAILS
Full specifications
Pages 38-40
The Milan

The Milan is the ideal choice of stove for a contemporary setting. Its sleek cylindrical lines allow it to stand within a room and provide an attractive and highly effective source of heat.

It is available as a six series multi-fuel stove and a four series wood burning stove.
The Salisbury

The Salisbury is very much in the style of a traditional wood burning stove. The reliability and efficiency of the stove are reflected in its robust and uncluttered appearance. As with all stoves in the Chesney’s collection, it has a solid cast iron door housing a large glass window that allows the fire to be enjoyed in all its warmth and beauty.

It is available as a six or eight series multi-fuel stove and a four, five, ten or twelve series wood burning stove.
With its simple good looks, the Salisbury stove will sit comfortably in a wide range of interiors. It can also be very successfully combined with an attractive stone fire surround as in the facing image.
The Salisbury 12 series wood burning stove in black anthracite paint finish.

DETAILS
Full specifications
Pages 38-40
The Salisbury is now also available as a 10 series double sided wood burning stove and a 12 series wood burning stove, for larger rooms that require an increased heat output.
The Beaumont

With its elegant and refined appearance, the Beaumont is a stove that will look at home in the most sophisticated of interiors. Its design includes swept cabriole legs and a corniced top section, uniquely classical features that are not to be found in other stoves.

The Beaumont is available as a six or eight series multi-fuel stove and a four or five series wood burning stove.
With its classical detailing and handsome appearance, the Beaumont is an elegant addition to the decorative scheme of any room.
The Beaumont is now available as a 5 series wood burning model that provides a particularly good view of the fire through its landscape proportioned glass window.

The Beaumont 5 series wood burning stove in black anthracite finish is shown with the La Rochelle marble surround from Chesney’s collection of hand carved fire surrounds.

DETAILS

Full specifications
Pages 38-40
Chesney’s Solid Fuel Stove Collection
The Shipton

The Shipton displays the attention to detail that characterizes the design of every Chesney’s stove. The corniced top section and robust plinth sit in perfect proportion with the main body of the stove, which features Chesney’s trademark large viewing window.

The Shipton is available as both a six and eight series multi-fuel stove.

The Shipton
8 series multi-fuel stove in black anthracite paint finish is shown with the Clandon Bolection limestone surround from Chesney’s collection of hand carved fire surrounds.

DETAILS
Full specifications
Pages 38-40
The Shoreditch

The Shoreditch is one of the most versatile stoves in the Chesney’s range. Its simple clean lines allow it to sit comfortably in a wide range of interiors and make it the ideal interior for a fire surround of contemporary architectural style. It is also available with an integral log store.

It is available as a six or eight series multi-fuel stove and a four or five series wood burning stove.

The Shoreditch 8 series multi-fuel stove is shown with the Kent limestone surround from Chesney’s collection of hand carved fire surrounds.

DETAILS
Full specifications
Pages 38-40
With its modern linear design this stove will sit comfortably in a wide range of modern interiors. Installed either as a free-standing unit or within a fire chamber, the Shoreditch provides an attractive and heat efficient focal point to a room.

The versatile Shoreditch 8 series multi-fuel stove can be positioned in an existing alcove or in a suitable area within the room.

Details

Full specifications

Pages 38-40

Shoreditch 8, Shoreditch 5 and Shoreditch 4 are also available with XLS and LS log stores (not illustrated)
The timber that you use for your stove should only come from woodlands that are managed sustainably.
How to get the best out of your stove

Using and maintaining your stove in the correct way will contribute to its efficiency and longevity and maximise the beneficial effect that its use will have on the environment.

Chimney draught

A good chimney draught is essential if you are to obtain the optimum performance from your stove. There are many variable factors that affect the performance of a chimney and your local Chesney’s stockist will be able to advise you on the suitability of your chimney for use with a stove. If you do not have a chimney it is possible to have a prefabricated chimney system installed which is compatible with a multi-fuel stove. It is important that you have your chimney cleaned once a year by a NACS (National Association of Chimney Sweeps) registered sweep.

Fuel

It is essential that you burn seasoned dry firewood with a moisture content of less than 20%. Burning wet wood will adversely affect the performance of your stove, creating tar deposits in the chimney and causing the glass in the stove door to blacken. Use of a moisture meter will allow you to check that the moisture content of any wood that you are intending to purchase is satisfactory.

If you are supplying your own firewood, it should be stored for at least a year after cutting and splitting to enable it to dry out. Storage should be in a dry well aired location. Hardwood will generally burn for longer than softwood and the latter will make better kindling as it lights easily. Sources of wood such as decking, fencing, demolition materials, painted or treated wood, driftwood or rubbish should under no circumstances be used as fuel for your stove. See The National Energy Foundation website (www.nef.org.uk/logpile) for a database of wood fuel suppliers.

For advice on solid fuel contact an approved coal merchant or call the Solid Fuel Association advice line on 0845 601 4406 or visit their website at www.solidfuel.co.uk.

Maintenance

The door seals of the stove should be regularly checked to ensure that there is an airtight seal. If the sealing rope is not intact it will result in draughts entering the stove which affect its combustion efficiency. The fireproof bricks that line the stove should also be checked for signs that they may be starting to crumble. It is acceptable for cracking to be seen but not disintegration of the bricks as this will reduce the insulation in the firebox leading to low temperatures and inefficient combustion.

It is also important that the ashpan is not allowed to overflow as the hot ash can cause the grate of the stove to distort.

Provision of ventilation

All stoves require air for combustion. To comply with Building Regulations (Document J) any stove with a maximum heat output of over five kilowatts will require its own dedicated supply of air by means of an air vent.

Installation

Your stove and flue must be installed by a HETAS approved installer. HETAS is the governing body for the installation of wood burning and solid fuel appliances and its approved installers have all completed the training course necessary to obtain accreditation.

No combustible material to be installed above the appliance.
A number of the stoves in this brochure have been installed with hand carved chimneypieces from Chesney’s range of period and contemporary stone and marble fire surrounds. This is widely acknowledged as the leading collection of its kind in the world, and also includes a wide selection of fire baskets, fire dogs, andirons, fire tools and register grates. Separate full colour brochures are available illustrating these ranges.
