

WOODGRAIN EFFECT Hollow Domestic Grade Composite Decking Board 4m

Available in a range of colours including Teak, Coffee, Charcoal, Ivory, Stone Grey, Redwood and Olive Green, each board is produced in the same combination of 60% recycled hardwood fibres and 40% recycled polyethene, bonding agent, additives and tint, as the rest of our solid and hollow domestic grade decking boards range. All Cladco boards can be cut or sanded to fit your needs.

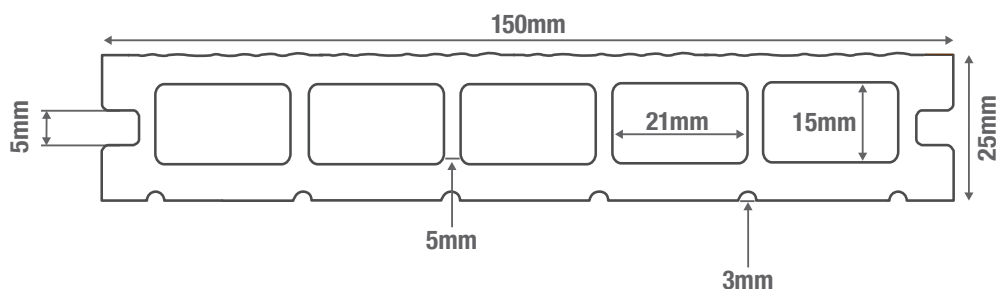

The woodgrain effect hollow composite deck boards are reversible, however please note you may find this woodgrain board more slippery than the low slip rated composite original boards. Both sides require easy maintenance and do not need you to stain or paint.

All Cladco composite decking products are available as FSC® certified for the same cost. If you require FSC® certified products please ask for these when placing your order.

Why Our 4m Hollow Decking Boards Are A Great Option

When you want your decking boards to really stand out and give a natural timber look, Cladco 2.4m woodgrain effect hollow composite deck boards will satisfy your needs. Lightweight and solid, using a hollow core honeycomb design, Cladco hollow domestic grade decking is a great option for any project, with the bonus of an attractive woodgrain effect.
